EXPERIENCE

Frontend Web Developer

Adaptive Future Technologies

07/2025 – Present

Ibadan, Nigeria

- Developed and maintained production websites and web applications using React, TypeScript, and Tailwind CSS, including modernization of legacy codebases.
- Improved website performance by 40% through frontend optimization, code refactoring, and more efficient application behaviour.
- Translated product and design requirements into responsive, accessible interfaces and collaborated within an Agile/Scrum development team.

Founder & Product Engineer

Isogun Labs

2026 – Present

Ibadan, Nigeria

- Built and maintain the Isogun Labs website with Astro, implementing responsive layouts, structured metadata, sitemap configuration, and SEO-focused page architecture.
- Founded an independent software studio focused on building focused productivity applications for modern software teams.
- Designed and shipped **Recap**, a Jira Cloud application, owning the product lifecycle from implementation and API integration through deployment and commercial launch.

IT Support Intern

Idea Konsult Limited

06/2023 – 12/2023

Ibadan, Nigeria

- Provided technical support to 200+ clients, applying structured troubleshooting to resolve software/OS issues and network bottlenecks.
- Streamlined device deployment by installing and configuring standardized software environments across 10 platforms.

Editor

VJDezignz & Alterations (Remote)

06/2022 – 12/2022

Kentucky, USA

- Curated and scheduled content across social platforms, driving an increase in engagement and an 80% rise in product sales within six months.
- Analyzed consumer behavior data using advanced Excel functions, improving marketing campaign effectiveness by 30%.

SELECTED PROJECTS

OyoBooking – Regional Hotel Booking Platform

oyobooking.ng

- Developed a responsive hotel booking platform with real-time availability and reservation workflows, applying mobile-first frontend practices.
- Integrated the frontend with backend APIs to retrieve availability and process booking-related data with accessibility and transactional reliability in mind.

Learncity – Tech Education Platform

learncityacademy.com

- Redesigned and developed a responsive career-focused education platform, translating product and design requirements into production-ready frontend interfaces.
- Contributed to a 25% increase in student enrollment within six months following the platform revamp.

Recap – Jira Cloud Status Reporting App

Atlassian Marketplace

- Built a commercial Jira Cloud app that transforms completed Jira issues into structured project status reports, reducing manual reporting work.
- Developed the application end-to-end using React, TypeScript, and Atlassian Forge, including product scoping, implementation, deployment, and iteration.

Field Hygiene for Jira – Atlassian Marketplace App

Marketplace

- Built and published a read-only Jira Cloud app that detects duplicate, near-duplicate, and unused custom fields and flags missing descriptions.
- Implemented field-count guardrails and daily trend history using Atlassian Forge, with no external servers or third-party data sharing.

TECHNICAL SKILLS

Frontend

Astro, React, TypeScript, JavaScript
HTML5, CSS3, Tailwind CSS
Responsive Design, Performance
Accessibility, Component-Based UI

Web & SEO

Sitemaps, Metadata, On-Page SEO
Core Web Vitals, Accessibility

Development

REST APIs, Atlassian Forge
Git, GitHub, Vercel

UI/UX

Figma, UI Implementation
Responsive & Accessible Design

AI-Assisted Development

Claude Code, Claude Skills
Lovable, Prompt Engineering
AI-Assisted Debugging

Data & Productivity

Excel, Jira, Documentation

Methodologies

Agile/Scrum
Cross-Functional Collaboration
Product Ownership

EDUCATION

Bachelor of Technology

Computer Science
Olusegun Agagu University of
Science & Technology
Ondo, Nigeria

2024

GPA: 4.09 / 5.0

CERTIFICATIONS

Project Management
Six Sigma Yellow Belt
Scrum Fundamentals Certified
Aptech Certified Hardware &
Network Specialist

ADDITIONAL

Core Strengths

Problem Solving
Attention to Detail
